

If you're not in a vehicle, you're probably a **pedestrian**

The safest place to be a pedestrian is on the sidewalk
But how do we walk safely on roads **without** sidewalks?

1 Walk on the **LEFT** side, so you can see cars coming

2 Walk on the grass or side of the road

3 Wear bright or reflective clothing

4 Walk in a group if you can

5 Use crosswalks when available
